Test Mapping - Report

Mapping Output

Valid ▲	Source Row	Target Row
valid	**A:ARAB:FR:2019**:2019	**A:ARA:FRA:2019**:2019
valid	**A:ARAB:FR:2020**:2020	**A:ARA:FRA:2020**:2020

Explain Mapped Row

Input Row

The following table shows the row of data used as an input to the mapping

Component Id	Component Value
FREQUENCY	A
SERIES	ARAB
COUNTRY	FR
TIME_PERIOD	2019
OBS_VALUE	2019

Output Row

The following table shows the row of data that was input from the mapping

Component Id	Component Value
FREQUENCY	A
SERIES	ARA
COUNTRY	FRA
TIME_PERIOD	2019
OBS_VALUE	2019

Component Mappings

The following table shows the breakdown of all the mappings used to derive the output. The bold values indicate the final value that was output, this is either because it was the only output for that component, or it was the result of taking the intersection from all the mappings that were used to create an output for the target component

	Source Component(s)	Output		
		Period	Component	Value
○	FREQUENCY	AllPeriods	FREQUENCY	**A**
○	SERIES	AllPeriods	SERIES	**ARA**
●	COUNTRY	AllPeriods	COUNTRY	**FRA**
○	TIME_PERIOD	AllPeriods	TIME_PERIOD	**2019**
○	OBS_VALUE	AllPeriods	OBS_VALUE	**2019**

Component Mapping - Matched Rule(s)

The following table shows the rule(s) that were used for the selected Component Mapping in the above table

Component	Rule	Input	Match	Capture Group	Substring Start	Substring End
COUNTRY	Equals	FR	-	-	-	-
